RESCUE FROM TREES

By ERS International

May 30, 31, and June 1, 2023

Emergency Response Solutions International, with the support of Sterling Rope and Stihl Equipment, has created a Rescue from Trees program. This program explores important safety and operational aspects not found in other classes. You'll do much more than take a quick look at arborist climbing systems and basic rope rescue techniques. You will learn about the unique aspects associated with rescuing a range of individuals who end up stuck in a tree. This includes hunters, ultralight pilots, parachutists, and more.

(See Attached for Additional Course Description)
